Menopause & sex: friends or enemies?

After about 35 years of periods, the menopause comes along and puts a welcomed stop to the monthly cramps, the bloody bed sheets, and the premenstrual mood swings. But, of course, the menopause triggers major physical and mental changes that can be equally difficult to navigate - and just when you think you've cracked womanhood... On top of it all, your libido - and your relationship with sex more generally - enters a new stage. So how does it all play out?
